Email

Chris.Lorenc@afslaw.com

Chris's work involves patent prosecution in the Life Sciences sector, including biotechnology and pharmaceuticals, small molecules, and chemistry.

Prior to joining ArentFox Schiff, Chris was a patent agent at a mid-sized law firm in Boston, and before that, Chris was a postdoctoral research scientist with Jack Norton at Columbia University, where his research involved replacing tin hydrides in pharmaceutically useful radical cyclization reactions with cobalt and vanadium complexes using hydrogen gas. He has over two years of process experience in industry working on the development of innovative synthetic methods and synthesis of complex molecules. His graduate studies at the University of Connecticut involved method development and new reaction discovery in the synthesis of natural product-like molecules. His work included phosphinemediated cycloisomerization of alkynyl hemiketals, the rearrangement of spiroketals, and small library synthesis/SAR studies of desoamine analogs.

Recognitions

- Doctoral Dissertation Fellowship Grant (2014)
- Boehringer-Ingelheim Doctoral Scholarship for Organic Chemistry (2013)
- Departmental Honors (2010)
- Elihu Root Fellowship (2010)

Life Beyond the Law

Outside of work, Chris enjoys playing hockey and golf and going to concerts and musicals.
